

Got My Cheque! Laurie Embree, Mile 108, BC

Laurie Embree, (Mile 108, British Columbia) is a long-time Peace Energy Co-op member and supporter. She contracted her Co-op to design and install a 10-kilowatt solar array for her home in 2015.

After her first full year of feeding power into the grid she has reduced her electrical bills to near zero and has received her first cheque from BC Hydro – she has produced more power than she needed, and has been paid by BC Hydro for that excess.

Congratulations Laurie for achieving your goal of being electrically net-zero!

“My roof top solar array will reduce my bills in my retirement years, and it will raise the value of my home when it comes time to sell. Now I feel much better about my carbon footprint on this planet that I call home.”
