

10.2 kW ground mount grid-tie

Charlie Lake, BC

"We feel compelled to consider an energy option that is, immediately and over the long term, kinder to our world."

"One of our considered choices is being a supporting member of Peace Energy Cooperative. Through this relationship, we have become more informed about sustainable energy at the local level. We also have access to expertise and a team who can design and install a solar array for our home."

Owners: Miep Burgerjon and Rudy Heistad, Charlie Lake, BC

Description: a grid-tied solar power system rack-mounted in a sunny open field just south of the residence. AC power from the microinverters was trenched over to the home's electrical service to power the home and feed excess into the grid.

Power Output: 100% of household needs

INCLUDED IN THIS PACKAGE:

- System design and all equipment supplied by Peace Energy Co-op
- Installation by Peace Energy/Haab Homes
- (30) 340 watt solar modules
- (15) APS microinverters
- Screw-pile and rack mounting system

"Living beneath the sun-filled skies of the Peace River area, harnessing this light to best advantage seems a more enlightened alternative."
