

### MOTORINO CTr

The Motorino CTr is combining old-school Custom styling and cruiser comfort with state-of-the-art technology. With the battery neatly concealed in the retro-styled "gas tank" top tube, the only subtle clues that this isn't just a great-looking bicycle are the oversized rear wheel hub and a small control panel on the handlebars.

The CTr backs up all that style with substance. Using high-torque, class-maximum 500W rear hub motor and high energy-density Lithium-Ion batteries, the powerful yet light and compact 36V 10 amp-hour battery pack delivers up to 20km range without pedaling and can go much farther with a bit of rider input.

**Suggested Retail Price: \$1795.00 + tax**
