ATTENTION ALBERTA BUSINESSES, FARMS & RANCHES: thinking about solar?

As of February 1, 2021, there is a new business incentive to help reduce your overhead costs with solar energy!

Qualifying businesses, farms and ranches can now get up to 25% of their solar project costs back (including their solar design/assessment costs)

from a minimum of \$1000 to a maximum of \$250,000!

Making your own solar electricity to reduce or eliminate your cost for electricity already makes good business sense.

NOW IT JUST GOT 25% BETTER!

Emissions Reduction Alberta (ERA) under the Energy Savings for Business (ESB) program is offering qualifying businesses up to 25% of their solar project costs back (this may include the solar design and assessment costs as well).

This program has just \$55 million available on a first come, first served basis.

THIS MONEY WILL GO QUICKLY – APPLY NOW!

Contact Peace Energy Co-op TODAY for help with your application and to move your solar project forward!
