

WHAT DOES IT MEAN TO BE A MEMBER OF PEACE ENERGY COOPERATIVE?

As a member of Peace Energy Cooperative you are an important part of an important organization. The transition to the renewable energies of sun, wind, earth and water is urgent and long overdue. We are a cooperative organization that is making that transition a growing reality every day and **your support is critical to our success.**

Established in 2003 we were western Canada's first renewable energy investment cooperative, the second in all of Canada, and, with the support of our membership, we have been breaking new ground ever since.

Peace Energy was the originator and principal mover that made possible British Columbia's first commercial wind development, **Bear Mountain Wind Park** (102 MW), now powering some 35,000 homes with clean wind energy.

Our solar power sales department has designed, supplied and installed almost **2 million watts of roof top and ground mount solar** for BC and Alberta Peace Region residents, municipalities, farms and businesses. Our District of Hudson's Hope Community Solar Initiative stands, at 510 kilowatts, the largest municipal solar installation in BC. And we have more and larger solar projects in the works!

When you become a member of Peace Energy Cooperative you join almost 700 like-minded members from across Canada who are helping make clean energy a reality. With your initial investment of \$100 you'll receive:

- 1) one **\$100 membership share that gives you a lifetime membership in Peace Energy Cooperative** with an attractive membership certificate suitable for framing.
- 2) **renewable energy investment opportunities** that may become available from time to time.
- 3) **information about green energy** in the Peace Region and around the world through our popular monthly blog *Watt's Happening* (sent directly to you every few weeks), our newsletter and our website.

- 4) a **voice**! As a member of Peace Energy, you are part of an extended network of like-minded people working to help shape local, provincial and federal policy on energy issues.
- 5) an **equal vote** with every other member for the election of the co-op board and other issues of importance to the co-op. Each member of the co-op has one, and only one, vote.
- 6) the opportunity to contribute to sustainable **economic development** in your community.
- 7) the knowledge that, by supporting Peace Energy Co-op through your membership, you are reducing greenhouse gas emissions and other pollutants, slowing global warming and creating a **safer and more secure future**.

Join us! Help us generate a clean energy future!

INVESTING IN PEACE ENERGY COOPERATIVE

As a member, you may choose to support our renewable energy projects by investing in the cooperative. Investment shares are made available from time to time, and may pay dividends from the profits that the co-op generates. We are a for-profit investment cooperative, but a return on your investment cannot be guaranteed. What can be guaranteed, however, is that your investment will be carefully allocated by your elected Board of Directors to help the Co-op achieve its primary goal: **expand the appreciation, understanding and adoption of renewable energy infrastructure for the benefit of the natural environment, human health and global prosperity.**
